

Statox 502 Central Unit

19" Carrier for Statox 502 Control Modules

Statox 502 Control Modules find a compact home in this central unit. Whenever Compur Monitors sensor heads are not connected to a process control unit, this compact rack will take up to 9 control modules, a power supply and intrinsically safe repeaters if needed.

The control modules are easily accessible from the front. On the back side there is a second DIN rail which can take a power supply and intrinsically safe repeaters.

The 19" rack is 4 units high, so that an extra panel with push buttons to manually trigger the self - test of the Statox 560 sensor head.

Technical data

Maximum number of Statox 502 Control Modules:	9
Dimensions:	19" (84 TE), 4 HE, Depth 270 mm
Statox 502 19" Rack	Art. No.: 557 044
Optional Push – button rail for external Statox 560 self – test triggers (for art. No.: 557 044)	Art. No.: 557 046
